Heat-sealed Audit and privacy labels

Fire Retardant

“Patient feedback is very positive about appearance and infection control.”

“Patient feedback was very good. They liked the look of them compared to existing curtains.”

“Curtains are easy to hang, light and quick to change.”

DISPOSABLE CURTAINS ARE QUICK AND EASY TO CHANGE LEAVING YOU WITH MORE TIME TO CONTINUE WITH OTHER DUTIES

- Disposable curtains are easy to manage and use
- Disposable curtains give your facility a fresh, clinical and healthy appearance
- Disposable curtains are cost effective against traditional fabric curtains
- All disposable curtains have date labels creating an audit trail for your own compliance systems

## The benefits of disposable curtains:

### Audit System

A visual audit system should be supplied with your curtains so the date they were changed is clearly visible.

### Privacy Labels

'No Entry' stickers on the outer face of the curtain eliminate the need for large signs which could be an infection control risk.

### No Track Adaptation Required

You do not need to adapt your curtain tracks in any way. Grosvenor disposable curtains are available with two different hanging systems - meaning curtains will fit to ANY track at NO EXTRA cost to your facility.

### Fire Rating

All disposable curtains should meet the relevant standard of curtains. Grosvenor Contracts disposable curtains are FR to BS 5867: Part 2: Type C.

### Quick and Easy

Disposable curtains are quick and easy for staff to hang giving your staff time to focus on important duties such as patient care.
